SUMMARY

A Computer engineering graduate with experience in software development and warehouse operations. Quick to learn new technologies and practices. Eager to apply skills in a professional setting.

EDUCATION

Batangas State University – Alangilan Campus

2020 – 2024

Bachelor of Science in Computer Engineering

Golden Country Homes, Alangilan, Batangas City

EXPERIENCE

Bandai Namco Philippines Inc.

January 2025 – Present

Warehouse Staff

J.P. Rizal Ave., LIMA Technology Center, Lipa City, Batangas

- Managed mold inventory within the warehouse, tracking 1,300+ molds using Microsoft Excel to ensure accurate stock records.
- Handled calls and emails to communicate information and requests related to warehouse operations.
- Efficiently scheduled and managed daily truck dispatches for the pickup and transfer of various products such as molds, resins, capsules, capsule vending machines, and toy parts.
- Managed transport documentation for proper tracking and encoded requests for delivery receipts.
- Communicated detailed instructions to drivers of company and rental trucks including delivery order and time-sensitive requirements.
- Prepared and organized documents for mold receiving, as well as for the disposal of defective toys.
- Received deliveries from local suppliers and brought them to their respective divisions in the company.
- Encoded the receiving of daily delivery receipts and sales invoices from local and foreign suppliers.
- Coordinated with warehousemen to help with tasks as needed demonstrating leadership and teamwork.

IntegrityNet Solutions and Services

February 2024 – May 2024

On-the-job Trainee

M. Pastor Ave., Pallocan West, Batangas City

- Developed web applications and integrated technologies commonly used by the company's software development team, demonstrating adaptability to their tools and processes.
- Managed CRUD operations using uAdmin, a Golang web framework open-sourced by IntegrityNet, while integrating frontend (HTML, CSS, JavaScript) and backend (Golang) technologies.
- Applied problem-solving skills to troubleshoot software issues as they arose during development.

PROJECTS

Website Portfolio

🌐 <https://ivanmaranan.pages.dev>

- Developed a responsive website portfolio designed using Figma and translated into HTML, CSS, and JavaScript, showcasing professional skills and projects.
- Deployed the website using Cloudflare Pages to ensure fast, secure, and scalable hosting.
- Created a detailed documentation about the technologies used, design thought processes, and features at <https://ivanmaranan-portfolio.readthedocs.io/en/latest/>

CupMatch

<https://cupmatch.pages.dev>

- Designed and developed a memory game where players guess the correct order of hidden items.

Restaurant Web Application

<https://ivanmarananprojects.pages.dev/restaurant-php/>

- Designed and developed a PHP-based restaurant web application using XAMPP for SQL database management.
- Wrote a comprehensive documentation available at <https://restaurant-php.readthedocs.io/en/latest/>

SKILLS

Programming Languages: Golang, PHP, JavaScript, HTML, and CSS.

Tools: Figma, Git, XAMPP, Microsoft Office, and Google Workspace.

Technical Skills: Inventory Management and Truck Dispatching.

Soft Skills: Leadership, Adaptable, Collaborative, Detail-oriented, Fast-learner, Hardworking, and Proactive.
